

Let's get critical!

NEUROETHICS CAFÉ, *presents*

Assistant research professor **Kristien Hens** on **NeuroEpigenEthics**: the investigation of how dynamic concepts of human biology influence the ascription of **responsibility**, specifically in the context of neurodevelopmental disorders.

Neuroethics Café is a series of informal meetings bringing together students, professors, and staff to discuss emerging neuroscience research and neurotechnologies and their ethical, societal and legal implications.

OCTOBER 5TH | 4PM-6PM
